# JavaScript

## Topics to be Covered:

- If statements
- Switch
- Statements & Expression
- Loops
- String

# JavaScript

## JavaScript If-else

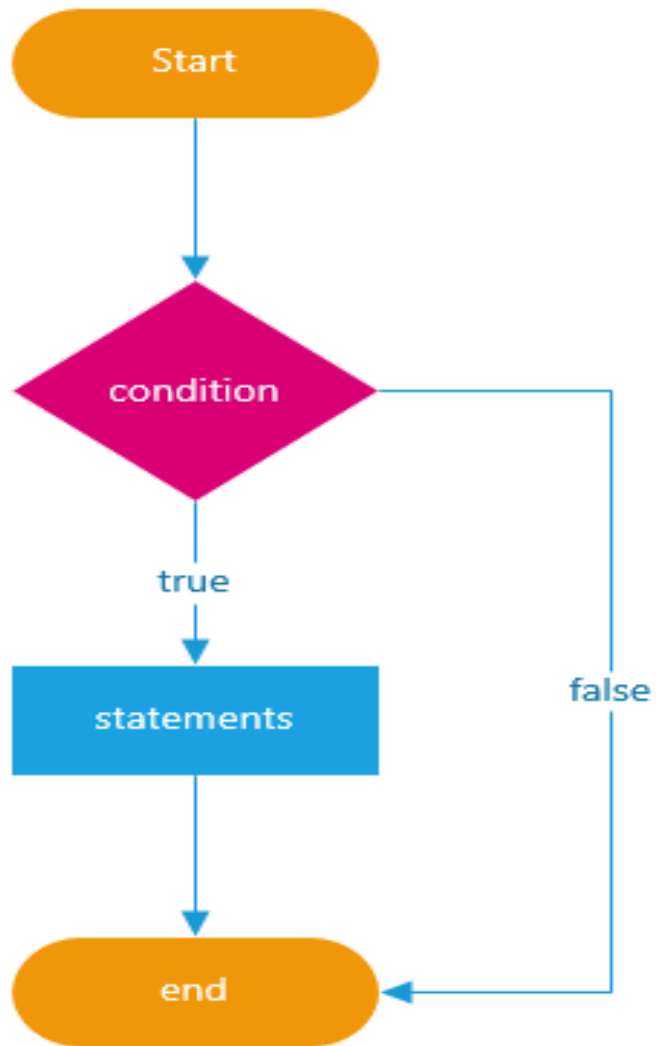

The **JavaScript if-else statement** is used *to execute the code whether condition is true or false*. There are three forms of if statement in JavaScript.

1.If Statement

2.If else statement

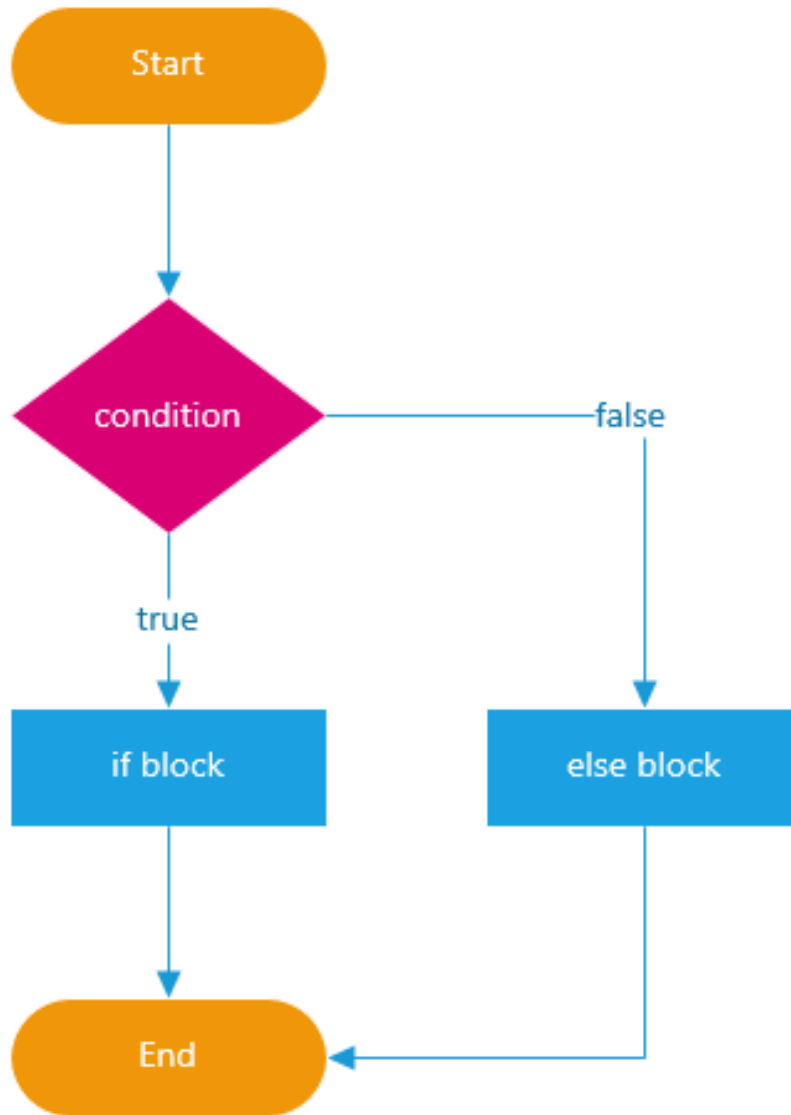

3.if else if statement

# JavaScript : If Statement

```
let x = 25;  
if( x > 10 )  
    console.log('x is greater than 10');
```

# JavaScript : If-Else Statement

```
let x = 5;  
if (x > 10) {  
    console.log('x is greater than 10');  
} else {  
    console.log('x is less than or equal 10');  
}
```

# JavaScript : If-Else If Statement

```
let a = 10,  
    b = 20;  
if (a > b) {  
    console.log('a is greater than b');  
} else if (a < b) {  
    console.log('a is less than b');  
} else {  
    console.log('a is equal to b');  
}
```

**Thank you**
